

# ASX and Media Release

## Challenger mine production not affected by recent weather event

WPG Resources Ltd (ASX: WPG, WPGO) advises that the recent and well publicised weather event in South Australia has not impacted gold production at its Challenger mine.

Challenger is not on the state's power grid. It has its own power station.

One FIFO aircraft service was deferred late last week due to power outages in Adelaide but the service was resumed the following day and is operating to the normal timetable.
